Revision History

Version	Date	Author	Description
0.1.0	2024-01-10	YAMLForms Docs	Initial draft
0.9.0	2024-04-20	Jane Doe	Added tables and calculations sections
1.0.0	2024-06-15	YAMLForms Docs	Added cover page feature, finalized for release

1. Content Elements

1.1 Headings

Headings support levels 1 through 6, similar to HTML h1-h6 tags.

Level 3 Heading Example

Level 4 Heading Example

1.2 Paragraphs

Paragraphs display body text. They support optional maxWidth and fontSize properties for fine-tuned control over text presentation.

This paragraph has a custom maximum width of 400 points and a larger font size of 14 points.

1.3 Rules

Rules create horizontal dividing lines between content sections.

1.4 Spacers

Spacers add vertical whitespace. Height is specified in points.

(24 points of space was added above this paragraph)

1.5 Admonitions

Admonitions are callout boxes for important information. Five variants are available.

> **Note: Note**
> Use notes for supplementary information that adds context.

> **Info: Information**
> Info boxes highlight general helpful information.

> **Tip: Tip**
> Tips provide helpful suggestions and best practices.

> **Warning: Warning**
> Warnings alert users to potential issues or important considerations.

> **Danger: Danger**
> Danger boxes indicate critical warnings that require immediate attention.

2. Form Fields

2.1 Text Fields

Single-line text input fields with optional placeholder and validation.

1. Full Name

2. Email Address

3. Phone Number

2.2 Textarea Fields

Multi-line text areas for longer content like descriptions or comments.

4. Additional Comments

2.3 Checkbox Fields

Boolean checkbox fields for yes/no selections.

5. I agree to the terms and conditions

6. Subscribe to newsletter

2.4 Dropdown Fields

Dropdown select fields with predefined options.

7. Preferred Contact Method

8. Country

3. Tables

3.1 Basic Table with Manual Rows

Tables can contain form fields in cells. Define columns and rows explicitly.

9. Contact Information

Name	Email	Phone	Primary

3.2 Auto-Generated Table Rows

Use rowCount with fieldPrefix and fieldSuffix for automatic row generation.

10. Line Items

Description	Quantity	Unit Price	Taxable

3.3 Table with Dropdown Options

11. Team Assignments

Team Member	Role	Status

3.4 Table with Static Labels

12. Product Specifications

Specification	Value
Model Number	Priority Level
Serial Number	~~Low Priority~~
Warranty Status	~~Medium Priority~~

High Priority

Urgent
